

Entrepreneurship-in-Residence (EiR) in Housing & Construction Innovation

IIT Palakkad Technology I-Hub Foundation (IPTIF), in collaboration with Habitat for Humanity International's Terwilliger Center for Innovation in Shelter (TCIS) and Kerala Startup Mission (KSUM), presents the Entrepreneurship in Residence (EIR) Program focused on housing and construction innovation.

The program supports entrepreneurs in developing, validating, and scaling innovative solutions across the housing and construction ecosystem through mentorship, prototyping support, and investment opportunities.

Benefits

- Monthly subsistence grant (up to 18 months)
- Pre-incubation & incubation support
- Mentorship & expert guidance
- Training & skill development
- Evaluation & startup readiness support
- Access to office space, infrastructure & admin support
- Networking with industry & ecosystem partners
- Legal & regulatory assistance

Focus Areas

- Innovation in Materials: New or improved construction materials.
- Alternate Building Materials: Eco-friendly substitutes for conventional options.
- Local Indigenous Practices: Traditional methods adapted for sustainable housing.

Who Can Apply?

- Early-stage innovators (Idea/PoC/MVP)
- Degree in Science/Engineering
- 18+ years, full-time commitment
- Tech-driven ideas for affordable & sustainable housing
